

## 6. How do I benefit as a home buyer?

---

If you are looking to **buy** a home, you are well aware that this it is a "buyer's market." But with so many homes on the market, how do you really find that "dream" property you want without spending an enormous amount of time, both on your own or with an agent. With FindBuyers.com, you simply enter as much criteria that defines your "dream" home as you wish, and we're talking about a lot of detail! Right down to the payment terms you are willing to accept.

We'll take it from there, matching your detailed wish list against thousands of homes in our database, many that may be unlisted elsewhere. When we find matches that meet at least 70% of your criteria, we'll let you know. (We'll let you know the matching quality percentage, so you can decide whether to pursue those or not.)

Now you can pick and choose on your time, and initiate a conversation with the seller and/or their agent if you wish. You will **never** be contacted by a seller or agent unless you wish to be!
