

5. What is the difference between FindBuyers.com and MLS?

MLS is a nationwide network of homes-for-sale listings used exclusively by licensed real estate agents. It is not free and it does not perform the type of sophisticated matching of buyer criteria to listed properties.

Because FindBuyers.com is not exclusive to agencies, we feature more properties with a greater level of detail generally available through MLS services. Note that having a listing on FindBuyers.com and MLS is not mutually exclusive.
